About Altus Nova

Altus Nova Technologies, LLC, is a small business entity registered with the United States Government. Our core competencies / experience include custom software advisory, development and additional support services to U.S. Federal Agencies. Our organization has a long referenceable track record of success.

Altus Nova has a seasoned management team of software experts, each having decades of experience delivering professional custom software development services. We are familiar with the demands our Government customers face and have adopted a proactive approach to developing real solutions to the problems our clients encounter.

Key Business Areas

Product Strategy

- Define business vision, goals, and success criteria
- Model current state v. future state
- Analyze cost-benefit, risks, and competitive opportunities

Product Management

- Define user experience and interaction models
- Document detailed product requirements and KPIs
- Simplify and integrate change management for overall success

Product Development

- Seamless 24x7 workstream, communications, infrastructure
- State-of-the-art design, development, and QA
- Expert deployment management and automation
- Ongoing operation support and complete documentation

The Altus Nova team stands ready to support any software development engagements.
